#1 - EXH: EXHAUST EXHAUST SYSTEM CONCERN - C/S: CUSTOMER STATES THERE IS AN ISSUE WITH THE EXHAUST, WHERE SOMETHING IS RATTLING ON COLD STARTS. BELIEVES IT TO BE THE RESONATOR. PLEASE CHECK AND ADVISE. Caused by Customer states there is a rattle upon startup when you put the transmission in gear. Was able to replicate the concern and laid underneath the vehicle to narrow down the location of the noise. The noise seems to be oil pressure related as it only happens during times of low oil pressure and high idle. Checked any TSBs on Ford and none found describing concern. Corrected by (E42) (NPF) (AS) FT 11311 Tech: Andrew Smith No correction needed. Recommend not putting the vehicle into gear until the vehicle is out of "high idle mode". Vehicle will make odd noises until oil pressure is properly distributed throughout the engine. causal part# DIAG	Warranty
